PVC-U SHIPLAP CLADDING

Robust, attractive, versatile cladding to enhance and refresh any home

Deeplas PVC-U shiplap cladding is the perfect way to update and restore the appearance of any building. It is ideal for replacing deteriorating timber, refresh old brickwork and add kerb appeal to your home.

Improve the thermal efficiency of your home

PVC-U shiplap cladding can help improve the insulation of your home – offering better thermal efficiency than brick, concrete or wood.

Easy installation with all the high-quality components you need

Shiplap cladding is designed for easy installation, with hidden pinning for a smooth, professional finish. It is available in 100mm and 150mm plank depths in 5m lengths. We also supply all the compatible edge trims, joining pieces and corner sections you need to complete a high-quality, professional installation.

Why choose Shiplap Cladding?

- Attractive shiplap style adds an interesting new feature to any home
- Robust, flat finish that retains its shape for life
- Manufactured from lead-free calcium organic PVC-U compound
- Long-life, weather-resistant, low-maintenance wall covering
- Offers better thermal insulation than brick, concrete or timber
- Quick and easy-to-install
- Full range of finishing PVC-U trims
- Quality assured

EMBOSSED CLADDING

DEEPLAS CLADDING

Refresh tired, old brickwork or timber cladding with robust, fresh PVC-U embossed cladding systems

Deeplas PVC-U embossed cladding provides an attractive, low maintenance, weather resistant solution for replacing rotten timber cladding, concealing unsightly areas of brickwork or adding an interesting new feature to a property.

Available in shiplap and featheredge styles, embossed cladding is designed for easy installation. Our range of colours and realistic woodgrain finishes means you can create a truly unique appearance, whether you want a rustic timber-effect or a crisp contemporary white finish.

COASTLINE CLADDING

COASTLINE IS THE NEXT GENERATION IN COMPOSITE CLADDING

An innovative composite cladding that enhances the appearance of any property

Adds up to 10 years of guaranteed weatherproof performance to every exterior. What's really revolutionary is that Coastline has minimum contraction or expansion, whatever the weather conditions.

The secret to Coastline's hard-wearing, long-lasting looks and performance is its innovative composite structure – a patented triple composite of polymer resins, inorganic minerals and acrylic colorants that is extruded to give excellent dimensional strength and stability.

Why choose Coastline Cladding?

- Specially developed aluminium rail and fixing system
- Foamed composite base material with fire retardant
- Co-extruded with a UV-stable colour cap with outstanding fade resistance
- Minimal expansion/contraction
- Impact tested to rigid profile standards
- Skin – Acrylonitrile Styrene Acrylate, colour matched to RAL colour ranges
- Highly weatherable premium embossed matt woodgrain finish

Colours to enhance every project

Coastline Composite Cladding

Safety and sustainability

Adds up to 10 years of guaranteed weatherproof performance Coastline has been rigorously tested and is D rated to BS EN 13501. This means it conforms to British and European standards in Reaction to Fire and Single Flame Combustibility tests and is certified for use as an exterior wall insulation in all approved applications.

All the materials used in its manufacture are 100% recyclable. Because it's made from such a durable, long lasting composite, it never needs painting or treating with preservatives, both of which can contain volatile chemicals that can be harmful to the environment.

Unlike cement board, cutting Coastline panels to length releases no harmful silica dust, which has been linked to several serious respiratory diseases, including lung cancer. Plus, of course, you've got the peace of mind that comes from knowing they're all manufactured to the highest quality standards and fully BBA and BSI accredited.

TWINSON CLADDING

DEEPLAS CLADDING

Naturally beautiful, 100% recyclable cladding combining wood and PVC-U for a durable, low-maintenance solution

Twinson premium cladding can transform the appearance of any property, creating an eye-catching design feature as well as improving the thermal insulation of external walls.

Enjoy all the aesthetics of wood with all the durability of PVC-U

When you choose Twinson cladding from Deeplas, you get the natural beauty and warmth of wood combined with the durability and low maintenance of PVC-U. Twinson is a unique material made from a blend of wood and PVC, offering the special benefits of each.

Twinson premium cladding is available in two styles:

Flat 167 cladding: Comprises of hollow planks for enhanced insulation with a ventilated outer wall for air circulation, providing a continuous, unbroken wall covering. Available in 6m and 3m lengths.

Flat open 83 cladding: Solid Twinson cladding planks installed with open joints between the planks allow free air circulation between walls and cladding. Available in 3m lengths.
